Informatics Engineering graduate with strong experience in AI implementation, machine learning, large language models (LLMs), and data analytics. Currently working as an AI Engineer Intern at SIG, developing an end-to-end AI internal chatbot to help employees access, analyze, and visualize company data efficiently. Previously gained full-stack engineering experience at Telkom Indonesia by building a real-time web visualization system for network monitoring. A fast learner, adaptable, and highly motivated to grow in the technology field.

WORK EXPERIENCE

PT Semen Indonesia (Persero) Tbk

Dec 2025 – Present

AI Engineering Intern

- Developed an end-to-end AI-powered internal chatbot to support employees in accessing and understanding company data efficiently.
- Conducted early-stage research and experimentation on multiple AI platforms and frameworks (e.g., n8n, Flowise, and full Python-based implementations) to identify the most suitable architecture for enterprise chatbot deployment.
- Implemented a Retrieval-Augmented Generation (RAG) approach to enable the chatbot to retrieve relevant internal documents and databases, improving response accuracy and reliability.
- Integrated chatbot with sensitive HR and internal databases, enabling secure querying, summarization, and analysis while maintaining data access control.
- Designed tool routing and intent-based execution, enabling the chatbot to dynamically route user queries to appropriate tools such as SOP retrieval, HR database queries, analytics, summarization, and visualization.
- Implemented text-based and speech-based interaction (end-to-end), allowing users to interact with the system via voice and text.
- Built data visualization capabilities to transform query results into tables and charts, helping users gain insights quickly.

Telkom Indonesia – East Java

May 2024 – Aug 2024

Fullstack Engineering Intern

- Improved *recMe*, a real-time web platform utilized across 10+ cities under PT Telkom Indonesia Surabaya to monitor STOS operations and optimize field performance.
- Implemented responsive frontend interfaces enabling real-time visualization of 100+ network topologies and device statuses, improving monitoring accuracy.
- Built and integrated scalable backend APIs and real-time database connections, ensuring continuous uptime and accurate data synchronization.
- Enhanced system usability by developing drag-and-drop configuration, auto-save, and location-based access features, streamlining workflows for technical teams.
- Delivered project and stakeholder presentations to PT Telkom Surabaya branch leaders, effectively communicating technical progress and aligning product vision with management.

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS) – Surabaya, East Java

2021 – 2025

Bachelor of Informatics Engineering, GPA: 3.74 / 4.00

- Relevant Coursework: Database Systems, Database Management Systems, Data Mining, Deep Learning, Machine Learning, Artificial Intelligence, Knowledge-Based Systems Engineering.
- Teaching Assistant for: Database Systems, Database Management Systems, Programming Algorithms, and Operating Systems.

PROFESSIONAL DEVELOPMENT

Bangkit Academy – Surabaya, East Java

2024

- Selected as one of 4,650 top participants in *Bangkit Academy 2024 Batch 1*, a flagship technology program led by Google, GoTo, and Traveloka, and earned a professional certification in the Machine Learning Path.
- Designed and implemented an AI-driven recognition and interactive learning system to help individuals who are deaf or mute learn BISINDO (Indonesian Sign Language) more effectively.

Intermediate Level Student Management (LKMM-TM)

Aug 2023 – Sep 2023

Participants

- Selected among the Top 3 participants for outstanding performance in leadership simulations, strategic planning, and collaborative problem-solving.
- Completed an intensive leadership program focused on organizational management, crisis response, and performance evaluation.
- Applied key frameworks from the program to real-world scenarios within student associations, optimizing project outcomes and decision-making quality.

CERTIFICATIONS AND COURSES

- **Crash Course on Python** – Google (Coursera), 2024
Gained fundamental programming skills in Python, including data structures, functions, and automation.
- **Machine Learning Specialization** – DeepLearning.AI, 2024
Mastered supervised and unsupervised learning techniques and applied ML models using real-world datasets.
- **TensorFlow Developer** – DeepLearning.AI, 2024
Built, trained, and deployed neural networks using TensorFlow for computer vision and NLP applications.
- **TensorFlow: Data and Deployment Specialization** – DeepLearning.AI, 2024
Learned end-to-end ML workflow, from data pipeline preparation to model deployment in production environments.

ORGANIZATIONAL EXPERIENCE (SELECTED)

Computer-Informatics Engineering Student Association ITS Dec 2023 – Feb 2025
Vice Head – General Secretary of External

- Directed 4 major departments with 80+ members, ensuring initiatives aligned with organizational and academic objectives.
- Designed and implemented a structured evaluation and performance tracking system, improving operational efficiency and engagement across divisions.
- Represented the association in 10+ external collaborations, establishing new academic and organizational partnerships.
- Spearheaded 3+ long-term organizational initiatives that enhanced the association’s branding and external presence.

BEM Faculty of Intelligent Electrical and Informatics Technology ITS Apr 2023 – Nov 2023
Staff of Internal Affairs

- Initiated the Community Development Program for the Faculty of Electrical Technology and Informatics (FTEIC), forming 5+ student communities under a unified framework.
- Served as part of the Executive Board (Treasurer) for *Elite x Pesraf*, a flagship faculty event with 120+ staff and over 300 participants, managing finance and logistics.
- Coordinated internal operations to ensure smooth communication between faculty departments and student organizations.

COMMITTEE AND LEADERSHIP EXPERIENCE (SELECTED)

ITS DIES MUSIC Aug 2023 – Nov 2023
Project Officer

- Conceptualized and launched the inaugural *ITS DIES MUSIC* as part of the Dies Natalis celebration, developing the event framework, creative direction, and execution roadmap from the ground up.
- Led and managed a cross-functional team of 30+ members, overseeing recruitment, onboarding, and operational performance to ensure seamless event delivery.
- Coordinated external partnerships, logistics, and sponsorships, achieving high audience engagement and establishing ITS DIES MUSIC as a recurring annual program.

Schematics ITS May 2022 – Nov 2023
Treasurer

- Directed end-to-end financial planning and budgeting for four national-scale events (*BST, NPC, NLC, and REEVA*), encompassing 250+ staff and nationwide participants.
- Designed and implemented a structured financial management system (RAB) that improved transparency, compliance, and cross-departmental coordination.
- Supervised reimbursement workflows, invoice validation, and cash flow tracking, ensuring full compliance with institutional financial standards and audit readiness.

SKILL AND COMPETENCIES

Soft Skill	:	• Leadership, Team Collaboration, Empathy, Problem Solving, Adaptability, Time Management, Communication, Initiative, Critical Thinking, Attention to Detail.
Toolset	:	• TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, MySQL, Git, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, API Integration, n8n, Flowise, Visual Studio Code, Jupyter Notebook, Microsoft Office Suite, Canva, Figma, Google Colab. • Python, SQL, C/C++, Laravel, JavaScript.
Competencies	:	• Full-Stack Web Development, AI (LLM) & Machine Learning Implementation, Data-Driven Decision Making, System Optimization, Project Management, Technical Documentation, Cross-Functional Collaboration, Research & Analysis.
Language	:	• Indonesian: Fluent - oral and written. • English: Professional working proficiency - oral and written.
